

Your quality partner worldwide

# Electronic micropipettes

## The Acura® electro **926XS, 936, 956**

- The micro-, macro-, multichannel, electronic pipette models
- Premium pipette tips
- Reagent Reservoirs
- Pasteurs, straws and filters

# Electronic micropipettes

## The Acura® electro models

**Micropipette line making electronic pipetting simpler and safer than ever.**

**The microprocessor-controlled instrument includes intuitive software avoiding any complicated programming steps. No particular skills are required to get quick access to six working modes and many volumes to select from.**

**Two-year warranty.**

- Optimal ergonomics, light weight
- Easy, intuitive self-teaching programme
- Large display, reversible for right or left reading
- Swift-interchange battery pack
- Fast charge, long working autonomy
- Justip™ adjustable tip ejector fitting most tips
- Pipetting cycle counter
- 27 interchangeable volumetric modules all fitting same control unit

## Great built-in

Surf through mode selection by pressing a single button.

### Natural ergonomics

The Acura® electro offers shape, balance and working ergonomics resembling those of a manual instrument. But comfort is so greatly improved that pipetting and result consistency are just outstanding.

### Unique "right or left" display reading

Display converts instantly to right or left side reading. All information clearly presented and visible at a glance during programming, pipetting and calibration steps.

### Variable working speed

Located on the front side, speed selector allows swift change even during the pipetting process.

In addition, slow speed access at any time by gentle touch of start button.

### Pipetting cycle counter

A simple double click gives access to the number of pipetting cycles performed since last zeroing.

### Tip ejection - easier than ever

Maximal efficiency obtained with a large surface, ergonomically located ejector button. The shaft height adjustment system called Justip™ (4 mm span) - controlled by efficient click-stops - allows a wide selection of tips to tightly fit the nozzle. The multichannel bowed shape ejector head permits effortless, sequential tip ejection.

# working flexibility

## Forward mode

Aspiration and pipetting of set volume.  
Suitable for all applications.

## Reverse mode

Aspiration in excess, followed by dosing of set volume. Enhances reproducibility below 20 µL. Especially recommended for viscous and foaming liquids.

## Stepper mode

Tip filling and step-by-step distribution.  
Best suited to aliquot samples.

## Dilution mode

Aspiration of 2 or 3 different volumes for restitution in one shot. An easy way to dilute samples.

## Tactile mode

"Start and stop" liquid measurement and dispensing, used amongst others for titration and gel loading by simple touch of activation button.

## Mixing

"Up and down" liquid flow in the tip / vial.

## Interchangeable volumetric modules

One control unit fits a choice of 27 volumetric assemblies available separately. This greatly extends working possibilities and makes electronic pipetting affordable to all budgets. Disassembling and re-assembling without any tool contributes towards maximal flexibility. Calibration specificities of extra modules - as set by factory QC or by pipette owner - are retained in instrument memory.

## Pipette charging stand

Stand allows charging and storing up to three electronic pipettes or battery packs simultaneously. Each position is fitted with a red/green charging LED. One stand supplied with every initial package.

## Battery charging rack

Space saving stand holds up to three battery packs simultaneously. The ideal charging and storage accessory for spare batteries, available at any time.

## Calibration

Performance check and new calibration possible over two or three independent volumes (Vmin, Vmid and Vmax). New settings entered directly from the keyboard. Error message warns of any inaccurate plunger movement.

## Long working autonomy

NiMH battery pack exchangeable instantly. Fast battery charging (< 1.5 hours) and extended working autonomy (> 3000 consecutive pipetting cycles). Battery charge level clearly visible on display. Automatic energy saving stand-by when unused.

# Electronic micro, macro and multichannel pipettes

## Acura® electro 926XS micropipettes

- Reduced shaft length and conical end improve driveability
- Easy access to microtubes and microplates
- Optional longer volumetric modules
- Simple conversion by user at any time
- Unsurpassed metrological performance and stability

## Acura® electro 936 macropipettes

- Interchangeable nozzle protection filter
- Adapters for Pasteur pipette
- Outstanding accuracy and precision

## Acura® electro 956 multichannel

- Large selection of 8- and 12-channel models
- Light weight and perfect hand fitting
- Sequential tip ejection
- Also fit any single channel volumetric module

**926XS**

micro

10 - 200 µL  
20 - 350 µL

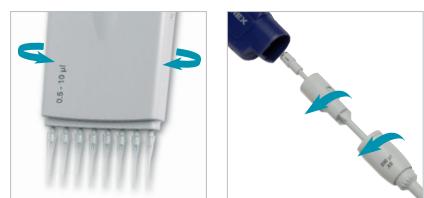

### Initial package

Recommended when purchasing an Acura® electro for the first time, each initial package contains one electronic pipette, QC certificate and operating instructions, charging stand, power supply, additional battery pack, Qualitix® pipette tips samples. Thereafter, additional pipettes can be purchased alone and charged on existing stand.

### Nozzle protection filter

Macro models accommodate a filter protecting instrument against liquid overflow and contamination. Located in the nozzle, it can be removed and changed easily.

### Optimal working position

360° rotation of multichannel volumetric modules allows selection of the best working position.

### Pasteur pipette adapter

Optional accessory fits 2 mL glass Pasteur pipettes instead of polypropylene macrotips.

Whenever sterilization is needed, volumetric modules can be autoclaved at 121°C / 250°F.

# Electronic micropipettes and accessories

## Performance and ordering information - Instruments

Initial package includes pipette, charging stand and accessories. Pipettes alone only supplied with individual QC certificate, Qualitix® pipette tips samples and operating instructions.

## Premium pipette tips

### The Qualitix® pipette tips from 10 µL to 10 mL

**The Qualitix® pipette tip programme is all about quality, flexibility and compatibility.**

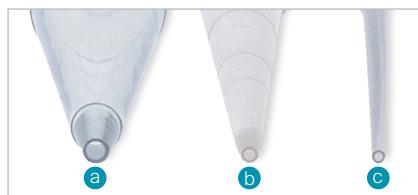

**An extended line for accurate liquid delivery, fitting not only Socorex but all major micropipette brands.**

**Packaging selection (bags, racks and *tipfill™* rack filling system), together with a choice of tip styles with and without protection filter, offer appreciated versatility.**

**Qualitix® and Socorex micropipettes are the most perfect match for optimized test results.**

- Wide selection, superior quality, autoclavable
- Bags, racks and *tipfill™* rack filling system
- Lot by lot consistency
- Certified free of nuclease, endotoxin and ATP
- Reduced packaging size, less bench space requirement
- Broad compatibility with major micropipette brands

**Free samples on request**

#### Beveled and fine pointed

Beveled tip end **a** greatly reduces sticking of liquid drops. Fine pointed tips **b** have a thin and soft end, enabling small liquid volume deposit, thus enhancing reproducibility in repeat pipetting. A long and soft end is appropriate for gel loading **c**.

#### Aerosol protection - No contamination

Filter tips include a 10 µm pore hydrophobic HDPE filter to retain any contaminant, efficiently protecting both pipette and sample. Certified high tip purity and gamma irradiation.

#### Low retention - Maximal recovery

Low binding tips **a** are made of silicone-free resin, greatly reducing surface adhesion and providing maximal liquid recovery. Available in 10, 200 and 1000 µL capacities, in sterile and non-sterile racks. Also protease-free certified, they are best suited for proteomic research and accurate handling of viscous liquids.

#### Qualitix® bioproof™ level

The Qualitix® line is free of detectable DNase, RNase, Pyrogen (Endotoxins) and ATP. Filter tips are additionally certified free of detectable human DNA and protease.

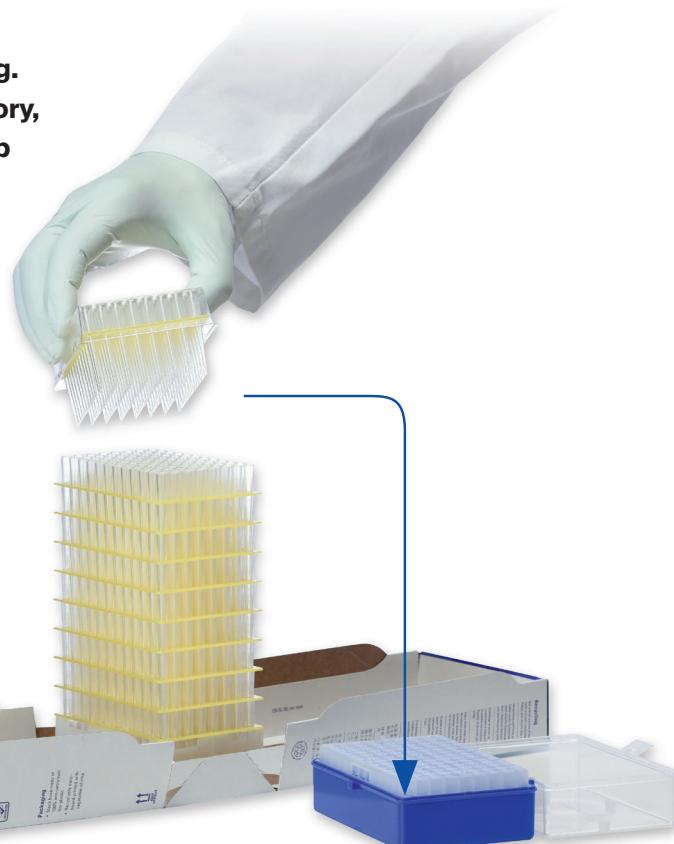

[View certificate](#)

## Rack filling system

The **tipfill™** packs are intended for easy rack loading. A practical and economical solution for any laboratory, limiting work interruption to a minimum. Each 96-tip insert is instantly transferred into an empty rack without risk of contamination. The transfer cover keeps tips clean and prevents wobbling during refilling.

See video

### Packaging options

Tips available in bags, hinged lid racks and **tipfill™** rack filling system.

### Space reduction

The smart re-closable **tipfill™** box uses far less space than corresponding amount of conventional racks and produces less plastic waste. This has a direct impact on storage requirement, shipping costs and environment.

### Environmental aspects

Packaging is optimized to ensure good protection while using minimal cardboard material.

## Application guide

| Tip style        | Features  | Benefits  |
|------------------|---|---|
| Regular tips     | Superior quality, optimal and universal pipette fitting.                    | Common use in daily pipetting with Socorex and other pipette brands.            |
| Filter tips      | Same as above, includes 10 µm pore size hydrophobic HDPE protection filter. | Efficient protection for both pipette and sample against aerosol contamination. |
| Low binding tips | Special material provides for very low surface retention.                   | Accurate handling of thick, viscous liquids and protein / peptide samples.      |
| Gel loading tips | Long, thin and soft tip end, universal fitting.                             | Precise sample distribution in confined area without damaging gel structure.    |
| Extended tips    | Long tip length, universal fitting.   | Easy access into narrow, deep tubes while limiting contact with tube wall.      |
| Saver tips       | Reliable tips, universal pipette fitting,                                   | Economical bulk packaging, best suited for large tip projects.                  |

## Reagent reservoirs

### V-shape reservoirs, 75 mL

Re-usable and autoclavable polypropylene. Embossed graduations guarantee long lasting legibility. Round corners enable convenient reagent pouring. Bottom shape ensures bench stability. Bring maximal flexibility for routine work with single and multichannel pipettes.

### V-shape reservoirs, with lid, 125 mL

Re-usable and autoclavable polypropylene. Hinged lid closure. Microplate format guarantees excellent stability. Stackable for space saving storage . V-shape bottom enables aspiration until last reagent drops. Suited for single and multichannel pipetting.

## Ordering information - V-shape reservoirs

### Multichannel reservoirs, non-sterile, 48 mL

8- and 12-channel polystyrene reservoirs. Each channel with round bottom. Total capacity 48 mL. Good bench stability. Microplate format enables use with automated, robotic pipetting devices and multichannel pipettes.

### Multichannel reservoirs, sterilized, 48 mL

Single wrapped 8- and 12-channel polystyrene reservoirs to be used in clean environment. Sterilized by X-ray radiation. Each channel with round bottom. Total capacity 48 mL. Good bench stability. Lot number facilitates traceability.

## Pasteurs, straws and filters

### Glass Pasteur pipette

Standard Pasteur models fitting 2 and 5 mL Acura® manual / electro macropipettes with their respective adapters. Useful alternative to macrotips, for instance when handling PP affecting reagents. Model and size selection fit most lab requirements.

### Ordering information - Pasteur pipettes

| Material               | Volume | Dimensions (l x Ø mm) | Packaging | Cat. No.    |
|------------------------|--------|-----------------------|-----------|-------------|
| Glass                  | 2 mL   | 150 x 7               | 250 / pk  | 313.02.150  |
| Glass                  | 2 mL   | 230 x 7               | 250 / pk  | 313.02.230  |
| Glass with cotton plug | 2 mL   | 150 x 7               | 250 / pk  | 313.02.150C |
| Glass with cotton plug | 2 mL   | 230 x 7               | 250 / pk  | 313.02.230C |

### Pasteur pipette adapters

Dedicated PVDF adapters with two internal O-rings tightly fitting glass Pasteur pipette (ext Ø 6.5 – 7.2 mm), without excluding the use of regular PP tips.

### Ordering information - Pasteur adapters

### Straw tips

Fitting the Acura® dilute 810 pipette. The long and thin straw tips allow pick-up of particle containing liquids in Stomacher® bags and deep, narrow reservoirs. Supplied sterilized in resealable bag.

### Nozzle filters for pipettes

Protection against liquid overflow or aerosol contamination. Filters are interchangeable, non-sterile, non autoclavable.
